

# More Layoffs?

JANUARY 20, 2012

The hospital announced today that they are considering more layoffs. They said that unless nurses agree to be re-assigned into float pools, as many as 75 RNs could be laid off, have their hours permanently reduced, or be offered only per diem positions.

This news is ...

- Despite the fact that more and more staff have reported that they did not get their breaks during a shift.
- Despite the fact that more and more nurses have reported that they are working out of ratio.
- Despite the fact that managers are editing RN time cards to avoid paying overtime and penalties.
- Despite the fact that more and more nurses have reported that they can't finish all their work in a single shift.

Our Union is vigorously investigating the hospital's claims and working to save each and every RN position. Watch our Union bulletin boards for updates.
